Ocean Power Technologies' PowerBuoy™ Successfully Deployed in the Adriatic Sea by Eni*Achieves Critical Next Step in Demonstrating Wider Commercial Uses for PowerBuoy™*

Monroe Township, N.J., December 19, 2018 (GLOBE NEWSWIRE) — Ocean Power Technologies, Inc. (NASDAQ: OPTT), a leader in innovative and cost-effective ocean energy solutions, announced today that the Company's PowerBuoy™ has successfully been deployed in the Adriatic Sea to advance Eni's R&D MaREnergy project, aiming to develop, deploy and demonstrate suitability of wave energy renewable technologies in Oil & Gas operations.

The OPT PowerBuoy™ will be used in the Adriatic Sea to advance Eni's research and development of proprietary integrated subsea technology systems to allow future applications for remotely controlled field developments powered by wave energy, environmental monitoring and offshore asset inspection using autonomous underwater vehicles (AUVs). The PowerBuoy™ will be used to demonstrate subsea battery charging, which eventually may be used to provide a standalone charging station and communications platform that would enable the long-term remote operation of AUVs.

OPT's PB3 PowerBuoy™ is a reliable and persistent power and communication platform for remote offshore applications such as autonomous vehicle charging, meteorological and ocean data collection, subsea equipment powering, and well monitoring for offshore oil and gas operations. The PB3 PowerBuoy™ supports a suite of end user selectable mission critical payloads while extending their range of operation, lowering their operational costs, and enabling real-time data transfer and decision making.

George H. Kirby, President and Chief Executive Officer of OPT, said, "Our team has worked closely with Eni to ensure the successful deployment of the PB3 PowerBuoy™ in the Adriatic Sea. Since our agreement was signed in March, OPT and Eni have achieved several key milestones. We believe this deployment represents another key step in the Company's history and will create new opportunities for our company going forward."

The agreement between OPT and Eni provides for a minimum 24-month contract that includes an 18-month PB3 PowerBuoy™ lease and associated project management. OPT will also provide deployment support, remote data collection and monitoring. At the conclusion of the initial 18-month lease, and upon meeting technical metrics, Eni will have the option to either extend the lease for an additional 18 months or purchase the PB3 PowerBuoy™.

About Ocean Power Technologies

Headquartered in Monroe Township, New Jersey, Ocean Power Technologies aspires to transform the world through durable, innovative and cost-effective ocean energy solutions. Its PB3 PowerBuoy™ uses ocean waves to provide clean and reliable electric power and real-time data communications for remote offshore applications in markets such as oil and gas, defense and security, science and research, and communications.
